

Edel Soccer Superblade Duo

The Edel Soccer Superblade Duo is a system based on the traditional monofilament fibre. Over the years, pitches made of this fibre have proved themselves as a substrate for football. The fibre's triangular shape ensures that it always returns to the upright, guaranteeing a high performance throughout the pitch's lifespan.

The best alternative to nature

Product characteristics of EDEL SOCCER SUPERBLADE DUO

Edel Soccer Superblade Duo stands for:

- Good playing properties: the pitch retains the correct ball roll
- High resilience due to the triangular shape of the TenCate fibre
- The fibre keeps its 'look and feel' throughout its lifespan
- Bi-colour
- UV-stability
- Less reflected glare during sunlight
- Bi-colour profiled fibre for all-round use

Construction

The Edel Soccer Superblade Duo system has been vetted for use with various substrates and infill materials. This enables a customised system to be supplied for every conceivable location.

Base material	: Polyethylene
Type of yarn	: Monofilament
Colour	: Fieldgreen/ Limegreen
Line colour	: White

TenCate is a registered trade mark of Koninklijke Ten Cate nv

FIFA Preferred Producer for Football Turf

With the 'FIFA Preferred Producer' initiative, FIFA hopes to enforce consistent quality standards for artificial football pitches around the world. Edel Grass also pursues this end and shares in the responsibility for quality assurance.

As a Preferred Producer, Edel Grass is expected to demonstrate its expertise in civil engineering, project management and maintenance.
