

Edel Hockey Elite LSR®/NDR

The Edel Hockey Elite LSR®/NDR synthetic turf system is the traditional sand-obscured pitch and has proved itself for decades in the playing of hockey. The fibrillated and micro-fibrillated TenCate LSR® fibre, combined with a high tuft density, ensures a uniform pitch with perfect ball roll properties. The LSR® component in the fibre guarantees controlled manoeuvring and slide-stopping. A unique performance, where even sprinkling is no longer a 'must'!

The best alternative to nature

Product characteristics of EDEL HOCKEY ELITE LSR®/NDR

Edel Hockey Elite LSR®/NDR stands for:

- The leading traditional sand-obscured pitch
- Perfect playing properties thanks to the filamented and micro-fibrillated TenCate LSR® fibre
- LSR® (Low Slide Resistance) for controlled manoeuvring and slide-stopping
- NDR (Non-Directional) for perfect ball roll properties
- No need for sprinkling
- Low/No H₂O® for efficient water consumption
- Durable hockey system for demanding players
- FIH National approved (dressed)

Construction

The Edel Hockey Elite LSR®/NDR synthetic turf system is available with various substrates: the traditional substrate and a substrate based on the Edel Grass Sports Layer for durability and water-based pitch playing properties. A customised system can therefore be provided for any location.

Base material	: Polyethylene
Type of yarn	: Fibrillated tape, micro-fibrillated
Colour	: Summer green
Line colour	: White (various colours available)
Outer line markings	: Various colours available

TenCate and LSR are registered and/or claimed trade marks of Koninklijke Ten Cate nv and/or its operating companies.

*Sand-obscured hockey system
with proven quality through
years of play.*
