

# TRIPLE-T SYSTEM

## Edel Hockey Triple-T System

The Edel Hockey Triple-T System (Taeke Taekema Turf System) is a revolutionary water-based hockey pitch. Thanks to a unique fibre system consisting of well over a million synthetic turf fibres per square metre combined with a shock-absorbent substrate, it delivers a perfect performance. A performance that is very similar to that of traditional nylon pitches. This makes the Edel Hockey Triple-T System the synthetic turf hockey pitch that can lift hockey to an even higher level!

**The best alternative to nature**

## Product characteristics of EDEL HOCKEY TRIPLE-T SYSTEM

The Edel Hockey Triple-T System stands for:

- Predictable ball roll due to a dense fibre structure consisting of 1,092,000 TenCate monofilament fibres per m<sup>2</sup>
- High ball speed
- Low friction coefficient (good torsion in both wet and dry conditions)
- Even drying of the pitch
- Low/No H<sub>2</sub>O for efficient water consumption
- Durability
- Colour-fast
- UV stable
- The new dimension in water-based pitches!
- Double-action backing for optimal stability
- FIH Global approved (unfilled)

### Construction

The Edel Hockey Triple-T System is available with a range of different substrates. The system can therefore be customised for any location.

Base material	: Polyethylene
Type of yarn	: Monofilament, micro-fibrillated
Colour	: Summer green
Line colour	: White (various colours available)
Outer line markings	: Various colours available

TenCate is a registered trade mark of Koninklijke Ten Cate nv
